

ERASMUS 2022-2023 SUMMER SEMESTER

Yaşar University | Türkiye

Deniz ERCAN

Hello, I am Deniz Ercan. I participated in the Erasmus+ mobility program organized by the RITM studio of the Interior Architecture and Environmental Design Department at Yaşar University, which included the BIP summer school program. During the training period, we attended seminars, including those led by our own professors, to gain insights into the process. These acquired skills would assist us in the projects focusing on the reuse of the İsa Bey Hamam in July.

After successfully completing the seminar period, we reached the most enjoyable part. We stayed at STOA in Şirince, divided into groups, and generated conceptual projects. We eagerly anticipated the opportunity to meet our friends from Greece and Spain, with whom we had been in communication for a long time, and were excited to transition to the implementation and design phase. Our stay became special, peaceful, and enjoyable with significant contributions from our professors.

Getting to know each other closely, sharing our cultures, fun moments, and ideas during the design process were delightful experiences. The fact that we still communicate without losing touch is the most beautiful reward of the summer school.
