

ERASMUS 2022-2023 SUMMER SEMESTER
Yaşar University | Türkiye
Doğa AKPULAT

Hello, I am Doğa Akpulat, a student of Interior Architecture and Environmental Design at Yaşar University. In the summer of 2023, I had the opportunity to participate in the summer school in Şirince organized by the RITM Research Group within the ERASMUS+ BIP project, and I would like to share my experiences with you.

Firstly, as part of the program, we conducted an 'Adaptive Reuse' project, focusing on the İsa Bey Hamam. Collaborating with students from West Attica University in Greece and ESADA in Spain, we designed and presented the project together. This experience allowed us to learn a lot from our friends and teachers studying the same field in other countries and gain new perspectives.

The program, which supported teamwork, communication skills, and socialization, added a lot to my personal development. We had a summer vacation where we traveled a lot, had a great time, and learned a lot. We created unforgettable memories and formed new friendships. On the farewell day, all my friends and teachers surprised me with a birthday celebration, singing the birthday song in many languages. This moment is something I will never forget throughout my life.

I would also like to express my gratitude to my valuable teachers who encouraged me to participate in such events and programs for the coming periods of my life.
