

ERASMUS 2022-2023 SUMMER SEMESTER

Yaşar University | Türkiye

Eren BAŞARAN

I am a second-year student at Yaşar University, majoring in Interior Architecture and Environmental Design. This summer, I had an incredible experience at a place called STOA in İzmir Şirince, with the contribution of the Erasmus office as part of the course Special Topics in Interior Design coded INAR 4491 and within the framework of the Erasmus+ BIP Summer School RITM Research Group Project. I collaborated with the universities of West Attica from Greece and ESADA from Spain.

During the 8-day camp, together with my peers who brought different cultures, knowledge, and experiences, we explored İzmir's culture and completed a joint project with a team of 6 people in a pleasant manner, fostering a sense of team spirit awareness.

This experience was unforgettable for me as it allowed me to exchange information with students from different geographies. I discovered some aspects of myself that I did not know before. They taught me a lot, both culturally and academically.

I am glad that I participated in such an organization. I am thinking of rejoining if it is done again next year.
