

ERASMUS 2020-2021 SPRING SEMESTER

Yaşar University | Türkiye

İlhami Mavioğlu

Hello, I am İlhami. I am a second-year student at Yaşar University, majoring in Interior Architecture and Environmental Design. I had the opportunity to work as a team for a week in the İsa Bey Bath Re-functioning project, organized by the RITM Research Group in İzmir/Şirince, as part of the Erasmus+ BIP Project, with the participation of students from different countries.

Throughout the project, we analyzed, visualized, and drew ideas, preparing presentations with mixed teams composed of students from various countries. Working with my team was very enjoyable, and I realized that each different culture brings a unique perspective to projects, providing me with a broader understanding of design. I aim to incorporate these diverse perspectives and design ideas into my future work, enhancing my skills with a more comprehensive perception of design.

Beyond the work aspect, we forged strong friendships. Even though the project has concluded, its impact on us, the students, continues. We have stayed in touch, and the memories and friendships created during this experience have become some of my most beautiful and unforgettable moments. It has been one of the greatest experiences of my life, and I'm glad I participated. Despite my initial hesitation, it has transformed into a project that I would eagerly join again tomorrow.
