

ERASMUS 2022-2023 SUMMER SEMESTER

Yaşar University | Türkiye

Buse Nur Yenilmez

I am a third-year student majoring in Interior Architecture and Environmental Design at Yaşar University. This year, I had the incredible opportunity to participate in the International BIP Erasmus+ Summer School Project organized by the RITM Research Group, which took place in Şirince. I shared this enriching experience with fellow students from Greece and Spain.

The main focus of the project was to present proposals for the reuse of the Isa Bey Bath. To achieve this goal, we were divided into mixed groups. Initially, I had concerns about completing the project within the given time frame and effectively communicating with my teammates. However, those worries quickly dissipated, as everyone was sincere and friendly.

This summer school turned out to be one of the most wonderful experiences of my life. Beyond exchanging projects and information, the enjoyable moments spent getting to know each other formed an unforgettable part of the program. Thanks to this, I have developed strong bonds and lasting friendships. Graduating with such a remarkable experience fills me with joy. It is a project that I wish we never had to leave and one I would eagerly participate in again.
